CAREER OBJECTIVE

Computer Science and Engineering student interested in web designing and front-end development. Eager to create clean, responsive, user-friendly websites and apply design fundamentals, HTML, CSS, and JavaScript skills in practical projects while continuing to learn.

EDUCATION

B.E./B.Tech in Computer Science & Engineering | 2023–2027 (Expected)

Higher Secondary Education (12th, Science) | Completed

WEB DESIGN & TECHNICAL SKILLS

- Web Design: HTML, CSS, responsive layout fundamentals, and basic UI styling
- Front-End Development: JavaScript fundamentals
- Programming: Java (core concepts), C, C++
- Database: MySQL / SQL fundamentals
- Tools: Git, GitHub, Visual Studio Code, Eclipse / IntelliJ IDEA
- Computer Science Fundamentals: OOP, basic data structures, DBMS

ACADEMIC PROJECTS

Java-Based Console/Desktop Application

- Developed a functional academic application using Java and object-oriented programming concepts.
- Practiced data storage and retrieval using file handling / JDBC with MySQL, as applicable to the project.
- **Mini Project – Data Structures Implementation:** implemented linked list, stack, queue, and binary tree concepts in Java and reviewed time and space complexity.

CERTIFICATIONS & TRAINING

- Java Programming – Core & Advanced Concepts
- Data Structures & Algorithms
- Introduction to Database Management Systems (SQL)

ACHIEVEMENTS & ACTIVITIES

- Participated in coding contests and college-level technical events.
- Member of the Computer Science / Coding Club at college.
